

## **Notes from the May 30, 2013 Meeting:**

For the inaugural meeting of the PE Inventors Club, founder John Aiken introduced himself and colleague Scott Carlson. They mentioned their areas of experience in the invention process. John had numerous handouts, such as the Patent Office brochure on Provisional Patents and generic confidentiality agreements. John made a slide presentation on the patenting process with attention to recent changes in the patent law. There was a discussion on other matters, such as how and when to seek input from others (not resolved).
